FINANCIAL STATISTICS

FOREWORD

In response to the demand for comparative financial statistics of Canadian municipalities, in a form readily available for reference, the Citizens' Research Institute of Canada has decided to issue, annually, data on Municipal Assessment, Taxation and Debenture Debt. It is hoped that this publication will be of service to public administrators, financial institutions and citizens generally. The following pages are the first instalment and cover the year 1919—the latest year for which comparative figures are available.

In the the present state of public accounting and reporting, it will be recognized that considerable difficulty was experienced and expense incurred in securing reliable and comparable data. Owing to lack of comparability of existing data, some classes of desirable information had to be omitted for the time being. There are indications, however, that we are at the beginning of considerable improvements in public accounting and reporting, and the Institute will extend its service as these improvements are effected.

All the figures in the succeeding pages are based on careful analyses of public documents—Dominion, Provincial and Municipal—and on such auxiliary and explanatory data as the Institute has been able to obtain by correspondence and research.
